WASHROOM ACCESSORY SELECTION AND APPLICATION GUIDE

WASHROOM REQUIREMENTS VARY WITH BUILDING OCCUPANCY TYPE.

Bobrick is a world-class manufacturer of high quality, durable accessories that contribute to the design of attractive, functional commercial and public washrooms. Our many years of experience have taught us that washrooms and the accessories used within them need to closely match the differing attributes and needs of all potential users. It is clear that, in order to meet these needs, it is important to divide washroom projects into different categories according to their end use.

In response to this and to aid selection of the most suitable and cost effective stainless steel washroom accessories for each project, this guide categorises Bobrick products in three distinct groups according to usage type.

PRESTIGE

In these high-end buildings and signature projects, typical washroom characteristics would include excellent architectural design and the use of high quality materials and equipment. Traffic flow would normally be moderate to low and abuse negligible.

HEAVY TRAFFIC

Typically, these are buildings with public access where large groups of people require the use of washroom facilities, often over short periods. In this case, washrooms and the accessories within them have to withstand periods of extremely high usage. Vandalism and abuse are to be expected and durability and extra large capacities become essential design considerations.

STANDARD USE

This is a demanding category where cost considerations may conflict with the need to maintain high standards of both architectural design and rugged practicality.

Washrooms in this environment are likely to be subjected to regular traffic and occasional abuse. In these buildings, equipment durability and minimum maintenance are just as important as budget considerations.

The following pages further illustrate the three categories and the table at the back lists our products and shows items considered most suitable for each usage type.

A SENSE OF OCCASION

For those buildings where only a distinctive design statement and co-ordinated, high-quality finishes are appropriate, stainless steel washroom accessories are the natural choice.

Here, the flush fit of Trimline™ and the subtle curves of Contura™ provide valuable creative flexibility.

These design features give strong visual continuity to both ranges.

And the strength of their stainless construction means that their good looks will stand the test of time.

London Coliseum

New Street Square, London

PRESTIGE ENVIRONMENTS

Corporate Headquarters
 Civic Centres
 Major Universities
 High Specification Office Projects

Sadlers Wells Theatre, London

HEAVY TRAFFIC HIGH CAPACITY

Heavy traffic washrooms call for the specification of high capacity, long-lasting equipment.

Intensive usage places high demands on the durability of products used in the washroom environment. High capacity allows reasonable service intervals to be maintained without compromising washroom tidiness.

Stainless steel is ideal for these harsh conditions, providing long life while retaining its aesthetics.

Dubai International Airport

Maracanã Stadium, Rio de Janeiro

HEAVY TRAFFIC ENVIRONMENTS

Shopping Malls
Sports Stadia
Railway Terminals
International Airports

University of East Anglia

STAINLESS QUALITY PLASTIC PRICES

Buildings with moderate traffic flows can also benefit from the advantages of stainless steel washroom accessories, even when budgets are tight.

Economies of scale and advances in manufacturing processes have driven down production costs.

Now the style, practicality and increased life expectancy of high quality, stainless steel washroom products have become a valid and affordable option.

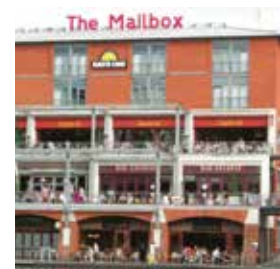

The Sony Centre, Berlin

Civil Justice Courts, Manchester

STANDARD USE ENVIRONMENTS

Healthcare Centres
Hospitality Projects
Government Offices
Courts of Justice
Commercial Offices

Mailbox, Birmingham

Bobrick's Portfolio of Values

Architects, developers and facility managers have selected Bobrick's performance-engineered restroom accessories with confidence for more than a century. As the market leader, we deliver building owner value through design excellence, compliance, sustainability and economical cost-in-use.

Robust engineering and built-in maintainability are the standards for our products, providing long-lasting functionality. Reduced repair and replacement costs also deliver a positive impact on the operating budget.

Three design-integrated series of accessories include ConturaSeries™ for prestige properties, TrimLineSeries™ for up-scale buildings and ClassicSeries™ for standard use and heavy traffic projects. From Class A to education and healthcare, recessed and surface-mounted, we have your design.

Cost-in-use savings are also trademarks of Bobrick washroom accessories. Products are designed to control soap and paper towel usage, reduce labour and maintenance expenses and to be vandal-resistant.

Bobrick is at the forefront of the touch-free commercial restroom with automatic models to limit cross contamination. Our stainless products are easy to maintain and sanitize through regular cleaning. Microban™ Antimicrobial protection is a Koala™ baby changing station exclusive.

Accessories fabricated of 50%-70% post-industrial stainless steel contribute toward LEED certification. Soap and towel dispensers are engineered to reduce consumables usage eliminating the need for proprietary towels and soap cartridges, thereby reducing the operating footprint of a given building.

Our products are engineered to meet the latest accessibility requirements including wall protrusion, mounting heights, reach ranges and operation. Bobrick also provides detailed consultation on compliant product selection and installation. Bobrick/Koala meet ADA-ABA, ICC/ANSI, ASTM, EN.

Non-proprietary dispensing of universal paper towels and bulk soap help building owners escape the high prices of consumables contracts common to closed system products. This facilitates open-market procurement and the ability to take advantage of a large variety of soap and towel options.
